

# Feature: User & Evaluation Management System

## User Story 1: Institution Owner Registration

### Objective

Enable Institution Owners to register securely and request activation.

### Main Scenario

A user with the permission – *Guest User* – must be able to **register as an Institution Owner** in order to **gain access to institution management features after approval**.

### User Journey

| User Steps | Action                        | System Steps | Expected Result                         |
|------------|-------------------------------|--------------|-----------------------------------------|
| 1          | User opens registration page  | 2            | Registration form appears               |
| 3          | User enters email and details | 4            | System validates input                  |
| 5          | User clicks Register          | 6            | System checks email uniqueness          |
| 7          |                               | 8            | Account created in “Pending Activation” |
| 9          |                               | 10           | Admin notified                          |

### Acceptance Criteria

- AC-01 Must allow registration with valid data
- AC-02 Must prevent duplicate email registration
- AC-03 Must set account status to *Pending*
- AC-04 Must notify Administrator
- AC-05 Must send confirmation email to user

## Messages, Notifications & Alerts

| ID     | Type    | Arabic                          | English                    |
|--------|---------|---------------------------------|----------------------------|
| MSG-01 | Success | تم تسجيل الحساب بنجاح           | Registration successful    |
| MSG-02 | Error   | البريد الإلكتروني مستخدم مسبقاً | Email already exists       |
| ALT-01 | Alert   | الحساب قيد التنفيع              | Account pending activation |

## User Story 2: Admin Activation of Institution Owner

### Objective

Allow Admin to activate Institution Owner accounts.

### Main Scenario

A user with permission – *Administrator* – must be able to **activate accounts** in order to **grant system access**.

### Acceptance Criteria

- AC-01 Admin can view pending accounts
- AC-02 Admin can approve/reject accounts
- AC-03 System updates account status
- AC-04 Notification sent to Owner

### Alerts

- Account activated notification
- Account rejected notification

# User Story 3: Institution Management (Owner)

## Objective

Enable Owners to manage teachers, classes, and children.

## Main Scenario

A user with permission – *Institution Owner* – must be able to **manage institution structure** in order to **organize learning entities**.

## Acceptance Criteria

- AC-01 Create/Edit/Delete Teachers
- AC-02 Create/Edit/Delete Classes
- AC-03 Assign Children to Classes
- AC-04 Validate required fields

## Enhancements Added

- Bulk upload (Teachers/Children)
- Duplicate prevention for children
- Audit log for changes

# User Story 4: Child Addition & Parent Auto-Creation

## Objective

Automatically create Parent accounts when adding children.

## Main Scenario

A user with permission – *Owner/Teacher* – must be able to **add a child** in order to **trigger parent account creation**.

## Acceptance Criteria

- AC-01 System creates Parent account automatically
- AC-02 Parent receives account email
- AC-03 Parent receives evaluation notification
- AC-04 Child linked to class

## Messages

- Account created email
- Child enrollment email

## Enhancements Added

- Temporary password generation
- Email verification step
- Resend email option

# User Story 5: Parent Evaluation (Institution Linked)

## Objective

Allow parents to evaluate their children.

## Main Scenario

A user with permission – *Parent* – must be able to **complete evaluation** in order to **assess child performance**.

## Acceptance Criteria

- AC-01 Parent can start evaluation
- AC-02 Max 2 attempts allowed
- AC-03 Parent can retake before approval

- AC-04 Final approval locks result
- AC-05 Results shared with institution

## Alerts

- Attempt limit reached
- Evaluation submitted
- Approval confirmation

## Enhancements Added

- Save progress feature
- Timer/session protection
- Warning before final submission

# User Story 6: Parent Self-Added Children

## Objective

Allow parents to manage non-institution children.

## Main Scenario

A user with permission – *Parent* – must be able to **add children independently** in order to **evaluate them privately**.

## Acceptance Criteria

- AC-01 Max 2 children allowed
- AC-02 1 attempt + 1 retake
- AC-03 Additional attempts require admin approval
- AC-04 Payment required for extra attempts

## Alerts

- Child limit reached

- Retake request sent
- Payment required
- Payment successful

## Enhancements Added

- Payment tracking status
- Retry payment option
- Expiry for payment link

# User Story 7: Retake Request & Payment Flow

## Objective

Manage paid retake requests.

## Main Scenario

A user with permission – *Administrator* – must be able to **process retake requests** in order to **enable additional evaluations after payment**.

## Acceptance Criteria

- AC-01 Admin receives request
- AC-02 Admin sends payment link
- AC-03 System verifies payment
- AC-04 New attempt unlocked

## Enhancements Added

- Integration-ready payment API
- Payment failure handling
- Notification on status

# User Story 8: Notifications & Reminders

## Objective

Ensure parents complete evaluations.

## Main Scenario

A user with permission – *Teacher/Owner* – must be able to **send reminders** in order to **increase completion rate**.

## Acceptance Criteria

- AC-01 Send manual reminders
- AC-02 System sends automated reminders
- AC-03 Track reminder history

## Enhancements Added

- Scheduled reminders
- Reminder templates
- Multi-channel (Email/SMS future-ready)

# User Story 9: Evaluation Visibility (Teacher/Owner)

## Objective

Provide aggregated insights.

## Main Scenario

A user with permission – *Teacher/Owner* – must be able to **view evaluation summaries** in order to **analyze performance**.

## Acceptance Criteria

- AC-01 Show evaluation status per child
- AC-02 Allow teacher evaluation if parent didn't
- AC-03 Display aggregated results only
- AC-04 Show class averages
- AC-05 Show top 3 skills

## Enhancements Added

- Filters (class, grade)
- Export reports
- Visualization charts

# User Story 10: Evaluation Analytics (Admin)

## Objective

Provide deep analytics for administrators.

## Main Scenario

A user with permission – *Administrator* – must be able to **view detailed analytics** in order to **monitor system-wide performance**.

## Acceptance Criteria

- AC-01 View individual child results
- AC-02 View cross-institution analytics
- AC-03 Drill-down capability
- AC-04 Export reports

## Enhancements Added

- Dashboard KPIs
- Trend analysis
- Data comparison tools

# User Story 11: Validation & Data Integrity

## Objective

Ensure data consistency and accuracy.

## Main Scenario

The system must **validate all inputs** in order to **prevent incorrect data entry**.

## Acceptance Criteria

- AC-01 Unique email validation
- AC-02 Required fields enforcement
- AC-03 Format validation (email, numbers)
- AC-04 Prevent duplicate records

## Alerts

- Duplicate email
- Invalid format
- Missing required field

## Global Enhancements (Added by System Analyst)

### Security

- Role-based access control (RBAC)
- Session timeout
- Password encryption

### Audit & Logging

- Track all user actions

- Admin audit logs

## **Performance**

- Pagination for large data
- Optimized queries

## **Scalability**

- Multi-institution support
- Modular architecture
